

Protecting and improving the Loddon catchment

YOUR RIVERS - YOUR VIEWS

Saturday 23rd November 2013, 10 am until 1.30 pm

Wednesday 27th November 2013, 1.30 pm until 5 pm

We are holding two workshops to discuss a range of measures which address the key issues affecting watercourses in the Loddon catchment.

Currently, less than 10% of river length in the catchment meets Good Ecological Status*.

We will cover a range of topics including water resources, water quality, agriculture, habitat degradation and alien species.

We need your input and ideas.

Swallowfield Parish Hall, Swallowfield Street,
Swallowfield, Reading, West Berkshire, RG7 1QX

*Under the EU Water Framework Directive
