

## Blackwater

Pressure	Issue	Location	Solution/comment
	'Awful' landscape	Upper Blackwater	Headwater management
Habitat Damage	Habitat	All waterbody	
Access	Public access	All waterbody	Open private land or expand green spaces to the public. This would also help with the removal of Himalayan Balsam.
	Water quality	All waterbody	
Pollution Incidents	Phosphate/WQ	Swallowfield et al.	Improve pumping station capacity.
Housing Run-Off	Expansion of development, run off and misconnections	Hawley Estate	
Industrial and Trade Discharge	Industrial run off	Ash/Aldershot/Farnborough	
	Development		Opportunity for improvement through regeneration – influence local planning authority.
	Flooding	All waterbody	Communication from the EA about impacts of work on flooding e.g. Arborfield.
Pollution Incidents	Railway embankment/culvert obstructions cause sewer flooding	Coleford Bridge area	
Flooding	Flooding and additional pressures from growth.	Ash and Swallowfield	Look at sites such as Hawley Meadows and fishing lakes etc for flood relief
Housing and Road Run-Off	Rainfall upstream causes flooding downstream.		Attenuation or headwater management
			Use the canal for drainage/removal of water from the river.
Housing and Road Run-Off	Surface water flooding		Maintenance of SUDS
Impoundments and Barriers to Fish Migration	Weirs increase flood risk and reduce fish movement.	Swallowfield	
Invasive Species	INNS	All waterbody	Coordination of measures
			Use Eversley as example of 'good practice'.
